Summary

Backend engineer with four years of experience building Python web services and the data layers behind them.

Skills

Python, Django, Django REST Framework, PostgreSQL, Docker, Redis, Celery, pytest, GitHub Actions

Experience

Backend Engineer, Northwind Logistics (fictional), 2021 - 2025

- Built a shipment tracking API in Django and Django REST Framework serving 2 million requests a day.
- Designed PostgreSQL schemas and indexes, cutting the slowest report query from 9 seconds to under 1 second.
- Packaged every service in Docker and wrote the Compose setup the whole team uses for local development.
- Moved background jobs to Celery and Redis, and added pytest coverage for the billing flows.

Junior Python Developer, Bluegrid Software (fictional), 2020 - 2021

- Maintained internal Django admin tools and wrote Python scripts for data imports.

Projects

Clinic Booking API

- A Django REST API with a PostgreSQL database for appointment booking, deployed with Docker Compose.

Warehouse Stock Alerts

- A Python and Celery service that watches stock levels in PostgreSQL and sends low-stock alerts.

Education

BS Computer Science, City Technical University (fictional), 2020
