Profile

Server-side developer who enjoys reliable systems, clean APIs and tidy database design.

Skills

Flask, FastAPI, SQLAlchemy, Postgres, Kubernetes, pytest, Celery, REST API design

Experience

Software Developer, Finlay Payments (fictional), 2022 - 2025

- Wrote payment microservices with Flask and FastAPI, tested with pytest.
- Tuned slow Postgres queries, wrote PL/pgSQL functions and managed schema migrations with Alembic.
- Containerised every service, built the container images in CI and shipped them to a Kubernetes cluster.

Associate Developer, Harbour Data (fictional), 2021 - 2022

- Built internal reporting endpoints with SQLAlchemy models on top of a relational database.

Projects

Invoice Tracker

- A Flask REST service backed by Postgres, running as containerised services behind an Nginx proxy.

Education

BS Software Engineering, Capital Institute of Computing (fictional), 2021
