Summary

Frontend developer focused on accessible interfaces, now moving towards backend work. I have no hands-on Docker experience yet.

Skills

React, TypeScript, CSS, Figma, Jest, basic Python, MySQL

Experience

Frontend Developer, Brightly Studio (fictional), 2023 - 2025

- Built a React component library used across six products.
- Improved keyboard navigation and screen reader support across the main dashboard.
- Wrote small Python scripts to clean up exported analytics data.

Projects

Recipe Finder

- A React and TypeScript single-page app that reads from a small MySQL-backed API built by a teammate.

Education

BS Computer Science, Coastal College of Technology (fictional), 2023
